CSN® Industrial immersion heater type EIT

DESCRIPTION

The electric CSN® industrial immersion heaters cover a power range from 1 to 5 kW and are suitable for a wide variety of applications. They are equipped without a controller and limiter as standard, giving you the flexibility to customise them to your individual requirements. Thanks to the IP67 protection rating, a handle and a generous 3 m supply cable with Schuko plug (up to 3 kW), they guarantee not only safety but also user-friendliness.

PRODUCT ADVANTAGES

- Universal, flexible application options
- Manual heating of liquid media
- Robust, industrial design
- Simple handling

- Individually configurable design possible - power / voltage / materials / connection cable

TECHNISCHE DATEN

Medium	Liquid
Power	50 to 5.000 W
Voltage	12 to 480 V
Tubular heating element diameter	8.5 mm
Materials Tubular heating elements	1.4404 (AISI 316L); 1.4541 (AISI 321); 1.4876 (Incoloy 800); 2.4858 (Incoloy 825)
Installation length	300 to 2500 mm
Installation position	Vertical from above
