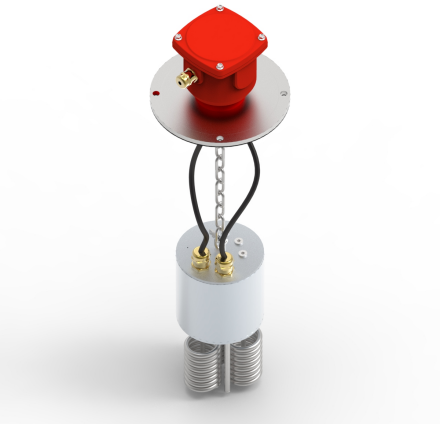
CSN® tank heater type THF

DESCRIPTION

Our electric flexible CSN® industrial immersion heater is specially designed for the efficient heating of heating oil and diesel fuel tanks. With a flexible chain suspension, it enables uncomplicated installation and customisation. Equipped with an integrated temperature controller and limiter, it ensures precise and safe heating. As an option, we offer the required control unit to further optimise operation.



PRODUCT ADVANTAGES

- Universal, flexible immersion depths
- Flanged design for standard dome lids
- Robust, industrial design
- High efficiency
- Individually configurable design possible - power / voltage / materials
- Integrated temperature control / limitation

TECHNISCHE DATEN

Medium	Liquid
Power	50 to 15,000 W
Voltage	12 to 480 V
Tubular heating element diameter	8.5 mm
Materials Tubular heating elements	1.4404 (AISI 316L); 1.4876 (Incoloy 800); 2.4858 (Incoloy 825)
Installation length	300 to 15,000 mm
Installation position	Vertical from above

Typ THF
